

*Case Study:  
Carcinoma  
Cuniculatum*

---

**Kristin D. Kelley, DPM  
PGY-II Chief Resident  
Central Alabama Veterans Health Care System  
11.21.08**

# History of the Case

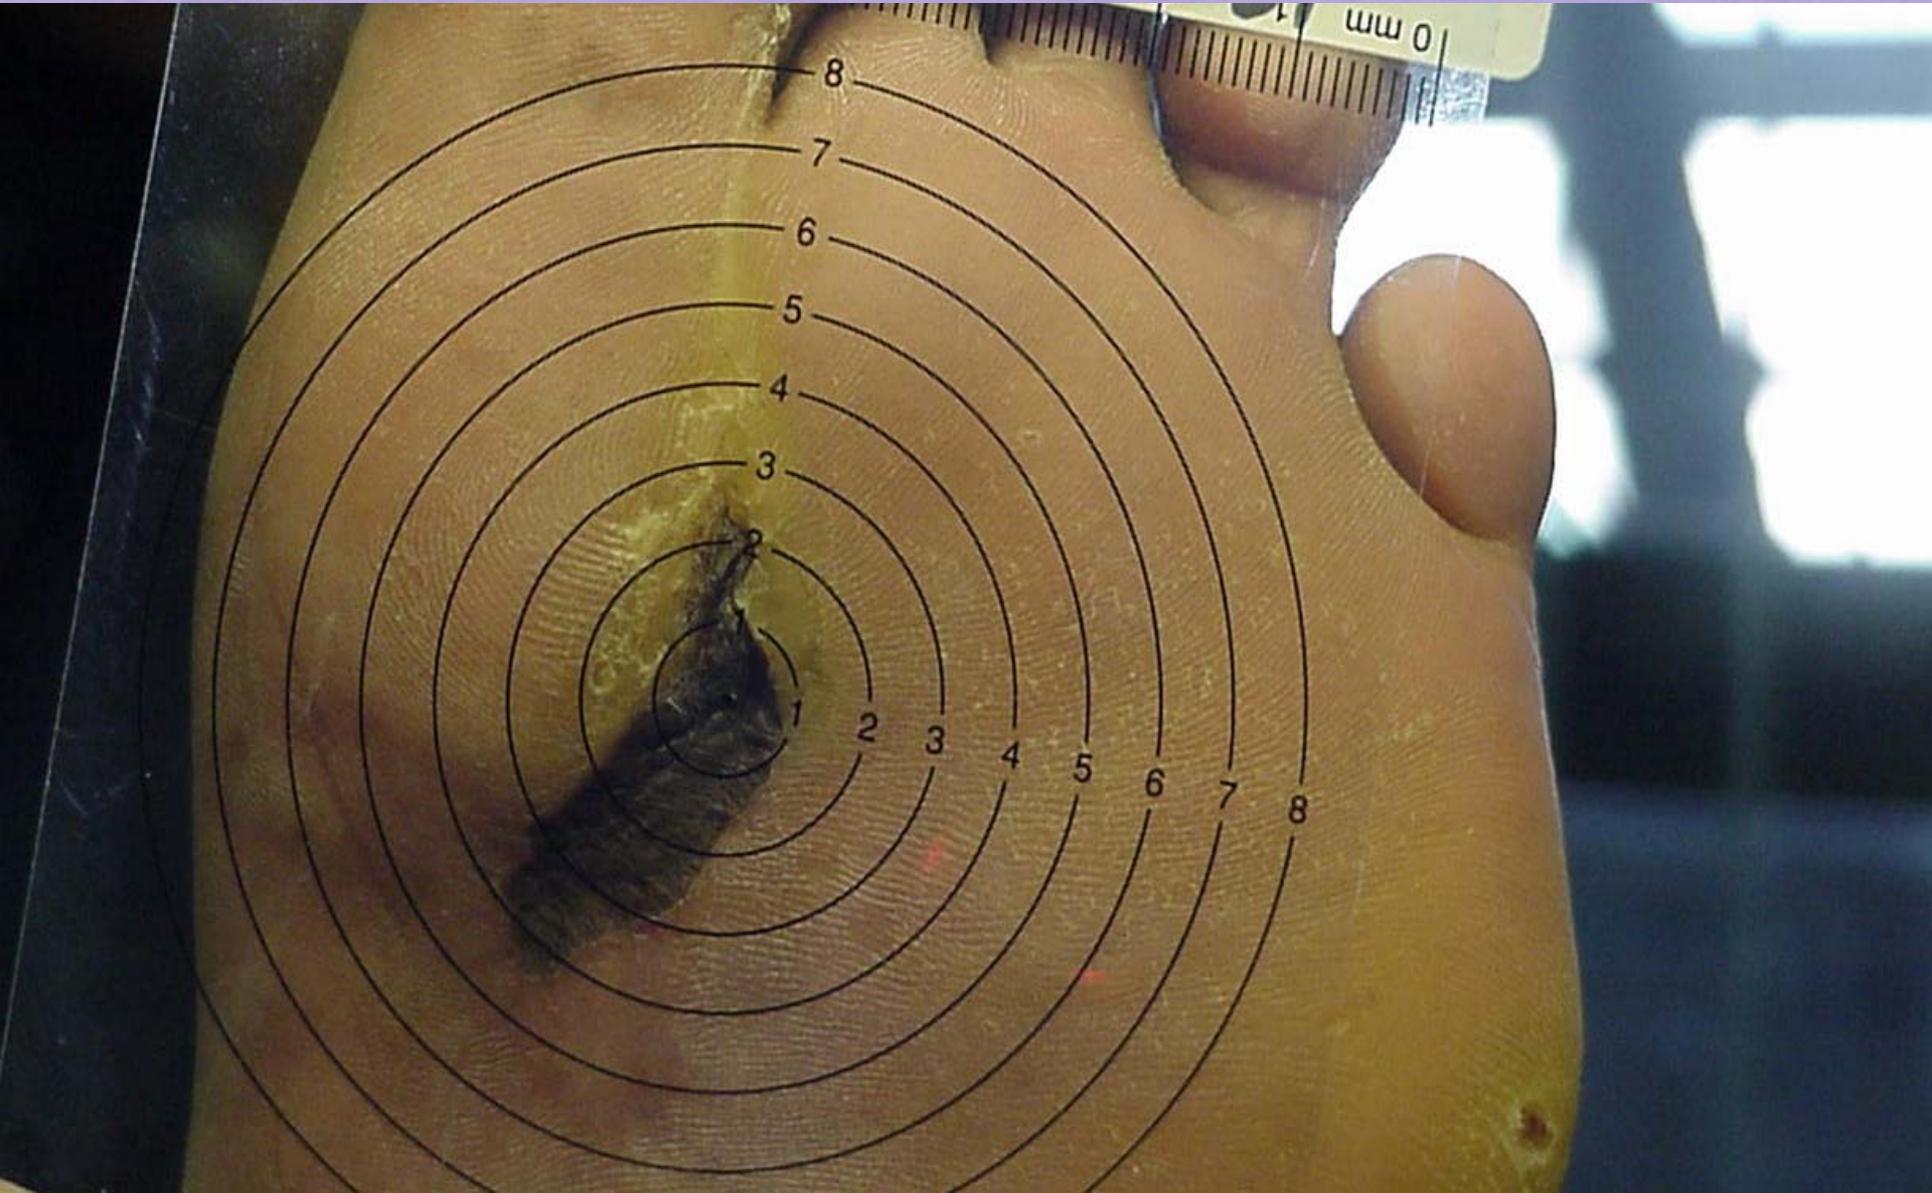

- 44 year old male presents to clinic with a plantar ulceration from a tumor that was previously resected but now with recurrence; pathology reported the lesion as a carcinoma cuniculatum
- Second surgical plan – wide excision of recurrent tissue growth with rotation flap graft and application of bioengineered tissue to the donor site

Typical pre-op appearance of a carcinoma cuniculatum

# Pre-Op Graft Planning

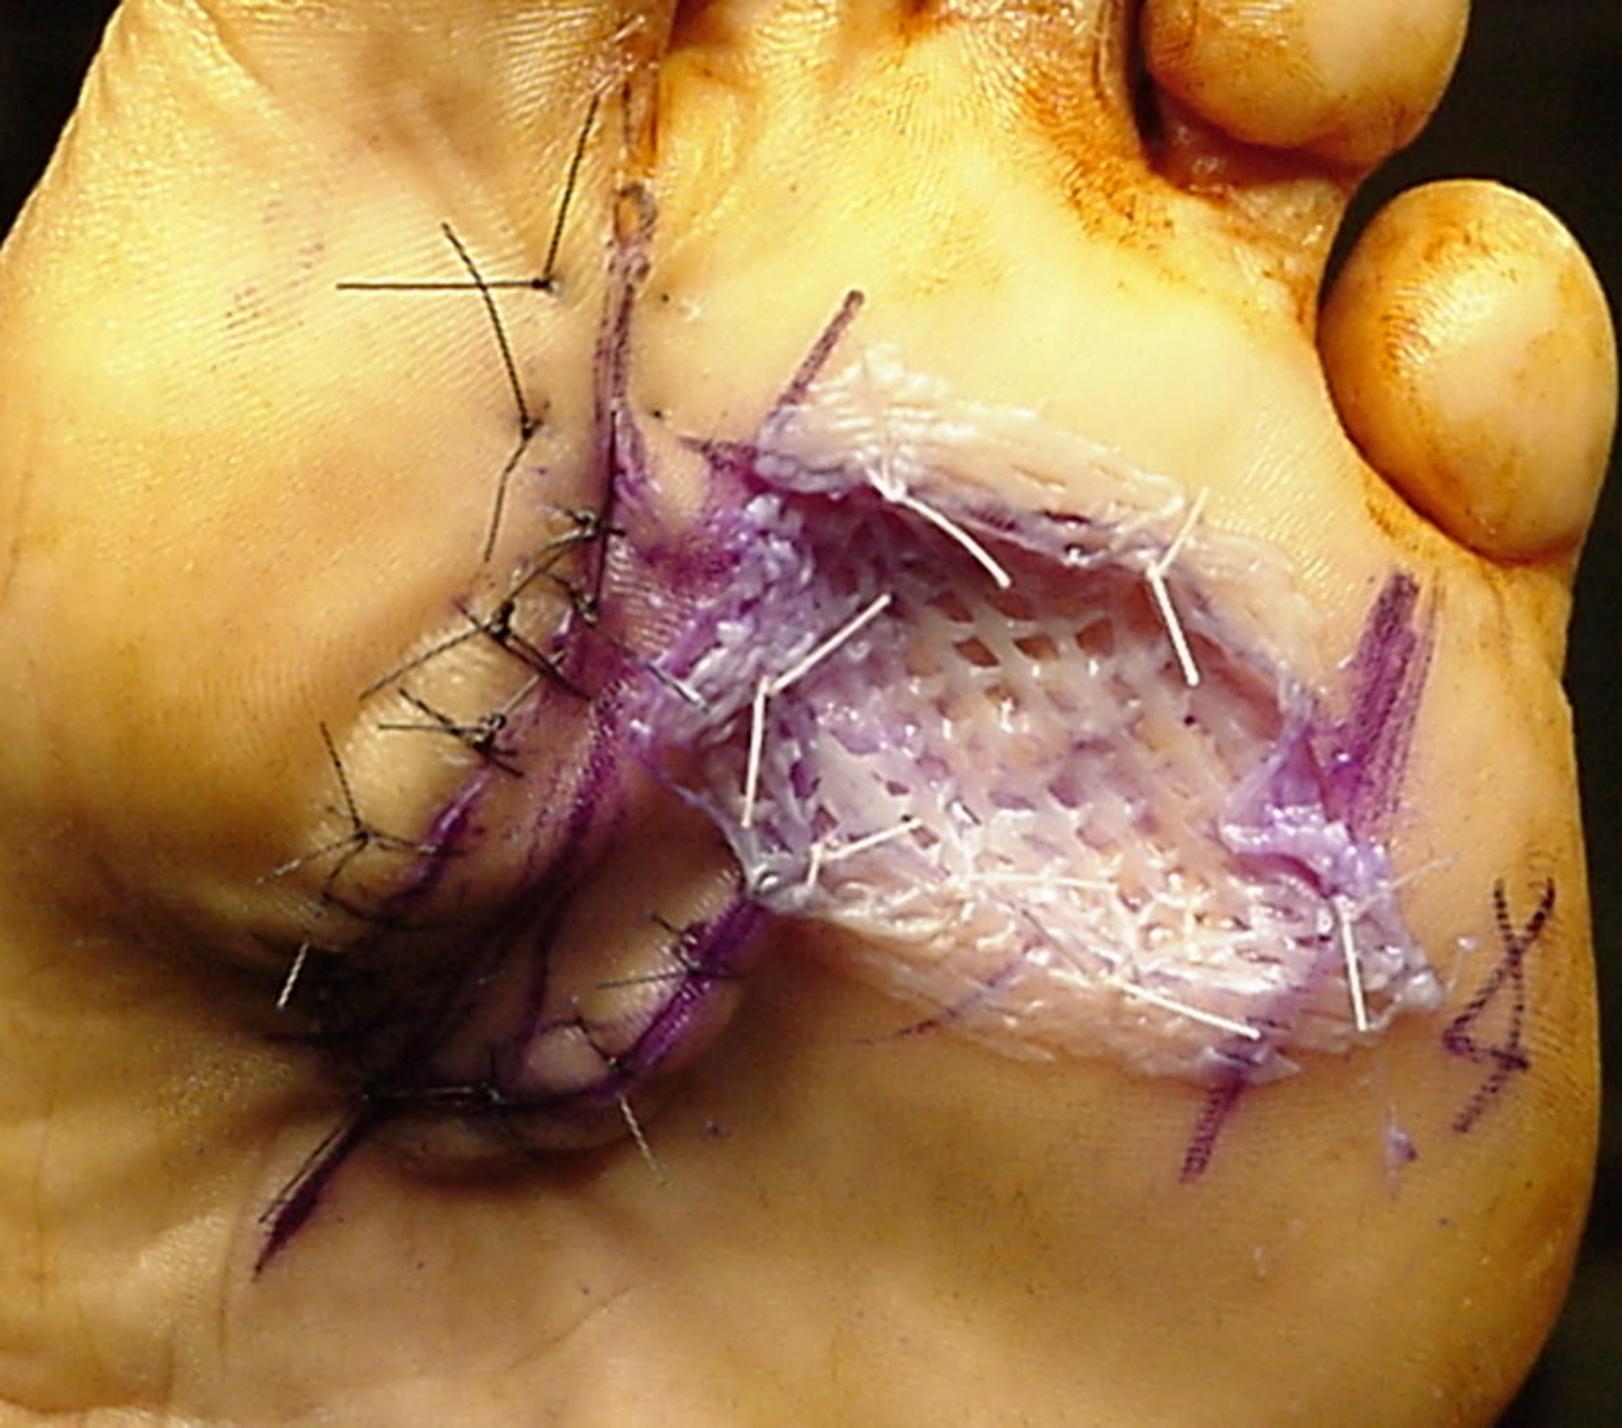

1-week Post-Op

**3-weeks Post-Op**

**6-weeks Post-Op**

**12-weeks Post-Op**

**20-weeks Post-Op**

# Thank You!
